PARKTOWN BOYS' HIGH SCHOOL
DEPARTMENT OF GEOGRAPHY

GEOGRAPHY

—June PAPER 2—

11 June 2026

MEMO

SECTION A – Rural and Urban Settlement Geography

QUESTION 1: Rural Settlement

1.1. Various possible answers are provided for each question. Write down only the letter of the correct answer next to the corresponding number.

1	**C**
2	**A**
3	**D**
4	**D**
5	**B**
6	**B**
7	**B**
8	**B**

(8 x 1) (8)

1.2. Choose a term from COLUMN B that matches the geomorphological description in COLUMN A. Write only the letter (A–I) next to the question number (1.2.1–1.2.8) in the ANSWER BOOK, for example 1.2.8 M.

(7 x 1) (7)

1	**H**
2	**G**
3	**F**
4	**D**
5	**B**
6	**C**
7	**E**

1.3. Refer to the diagram below and answer the questions that follow:

1.3.1	List TWO site factors that may have influenced the development of this settlement. **[Accept any TWO]** • **Water √** • **Soil √** • **Amount of open space √** • **Availability of building material √** • **Relief – Building on flat ground is easier √** • **Roads and water crossing √**	(2x1)(2)
1.3.2	Give ONE example of a tertiary activity that the settlement above might engage in. **[Accept reasonable answers]** **Sale of crops √** **Tourism (accept examples) √**	(1x1)(1)
1.3.3	The settlement next to the river is a wet point settlement. **Differentiate** between wet and dry point settlements. **[Concept]** **Wet point – Settlement built with access to water in mind √√** **Dry point – Settlement built to avoid water √√** **Note: Do not accept " far from water" for dry point, must be "avoid"**	(2x2)(4)
1.3.4	Explain why rural settlements are often dispersed. **[Accept logical answers]** **Built in vast areas √√** **Limited resources √√** **Built around fixed resource supplies (accept examples) √√** **Easier to maintain (smaller numbers) √√** **Improper panning (haphazard building) √√** **Extensive farming practices √√** **Low population density dur to migration √√**	(1x2)(2)

1.3.5	**Describe** TWO factors that may have influenced the pattern and shape of this settlement. **[Must discuss pattern AND shape]** **Pattern – Restricted by river, would not build on arable land √√** **Pattern – flat land, settlements concentrate on flatter areas √√** **Shape (clustered, cross roads) – Built where roads meet (better trading options). Clustered/linear best option for access to water and soil. √√**	(2x2)(4)
1.3.6	Why might this village grow into a town over time? **[Accept reasonable answers]** **Has access to essential site variables/resources. √√** **Already connected through trade/roads. √√** **Abundance of resources √√**	(1x2)(2) **[15]**

1.4. Refer to the article below and answer the questions that follow:

1.4.1	**Define** the term land reform. **A process of redressing the injustices of displacement and forced removal that took place during apartheid. (2) / Government programmes aimed at correcting past inequalities in land ownership and providing people with fair access to land. (2)** **[CONCEPT]**	(1x2)(2)
1.4.2	According to the extract, **why** has the land reform programme struggled to succeed? **Beneficiaries receive inadequate post-settlement support. (1)** **Lack of farming skills and training. (1)** **Poor financial management. (1)** **Business failures. (1)** **Community conflicts. (1)** **Do not receive enough technical, financial, and agricultural support after receiving land (2)** **[Any ONE]**	(1x1)(1)

1.4.3	**Explain** TWO reasons why land reform is necessary in South Africa. **To promote economic growth of those who were disadvantaged (2)** **To create self-sufficient farmers (2)** **To redress injustices/imbalances from the past (2)** **The legacy of apartheid predominated over the unfair distribution of land and land reform sets out to correct this injustice (2)** **National reconciliation (2)** **To improve food production in the previously marginalised sectors of the population (2)** **Land reform will help people to have access to land (2)** **To alleviate poverty as most communities during apartheid lived on communal land (2)** **[ANY TWO]**	(2x2)(4)
1.4.4	In a **short paragraph**, **discuss** methods that the government can put in place to provide support to people resettled on land after land reform. **Establishing educational centres in these settlements for up-skilling the communities (2)** **Training and development in modern farming methods/mentorship to new farmers (2)** **Monitoring and evaluation of processes must be reliable (2)** **Monitoring and evaluation of allocation of resources must be reliable (2)** **Relook at the policies of buying land (2)** **Subsidise small scale farming communities to encourage the buying and selling of their produce (2)** **Create market areas for trading (2)** **Revising land reform policies (2)** **Measures to ensure redistributed land is used productively (2)** **Inclusion of local communities to establish needs through consultation (2)** **[ANY FOUR]**	(4x2)(8)

1.5. Refer to the cartoon below showing the impact of the current ebola outbreak in central Africa and answer the questions that follow:

1.5.1	**Describe** the main message of the cartoon. **[Concept]** **The world does not care about Africa √√** **We are on our own when it comes to health issues √√**	(1x2)(2)
1.5.2	**What** social justice issue is being highlighted in this cartoon? **Lack of a basic right to health care √**	(1x1)(1)
1.5.3	**Explain** how the cartoon represents rural vulnerability during disease outbreaks. **[Accept reasonable discussions]** **Rural areas lack health care facilities √√** **When major disasters strike, rural areas do not get the support they need √√** **Rural areas are hard to reach √√** **Lack of signal or communication technology** **Rural areas are poorer areas in general and lack infrastructure to deal with disaster √√** **Rural areas lack education on these matters √√**	(2x2)(4)
1.5.4	Disease outbreaks like this are particularly damaging to the future of the rural communities in which they happen. **Describe** TWO consequences of disease outbreaks on rural communities. **[Accept reasonable answers]** **Many people will die √√** **Strong labourers die (production impacted) √√** **Families broken √√** **Future projects put on hold √√**	(2x2)(4)

1.5.5	**Discuss** TWO realistic ways the international community and local governments could improve support during rural health crises in Africa. **[Accept logical responses]** **Subsidise medication** √√ **Regular visits by medical professionals** √√ **Educate these people** √√ **Train locals in basic first aid/nursing** √√ **Build simple clinics in these spaces** √√ **Improve transport infrastructure so communities can get to hospitals.** √√	(2x2)(4)
		[15]

Total Question 1: 60 Marks

QUESTION 2: Urban Settlement

2.1. Various possible answers are provided for each question. Write down only the letter of the correct answer next to the corresponding number.

2.1.1	D
2.1.2	A
2.1.3	B
2.1.4	C
2.1.5	A
2.1.6	C
2.1.7	B
2.1.8	C

(8 x 1) (8)

2.2 Choose the word/term from COLUMN B that matches the statement in COLUMN A. Write only Y or Z next to the question numbers (2.2.1 to 2.2.8) in the ANSWER BOOK, e.g. 2.2.9 Y.

(8 x 1) (8)

2.2.1	Z
2.2.2	Z
2.2.3	Y
2.2.4	Y
2.2.5	Z
2.2.6	Z
2.2.7	Z
2.2.8	Y

2.3 Refer to the infographic below to answer the following questions.

2.3.1	Identify the land-use zone indicated as **A** in the infographic. **Central Business District/CBD (1)** (1 x 1) (1)
2.3.2	**Quote** from the infographic ONE role that land-use zone A may play in the future. **"high-density affordable residential accommodation" (1)** (1 x 1) (1)
2.3.3	State ONE characteristic of the land-use zone A that is evident in the infographic. **Tall buildings (1)** **High building density (1)** **High accessibility (roads/railway)** **[Any ONE]** (1 x 1) (1)
2.3.4	Which street pattern, **X** or **Y**, is usually associated with the land-use zone at **A**? **Y - (grid iron street pattern) (1)** (1 x 1) (1)
2.3.5	Give a reason for your answer to QUESTION 2.3.4. **Older areas of a city (2)** **Easier to layout/ construct/ subdivide plots (2)** **Older CBD built on flat gentle slopes (2)** **Better planning took place (2)** **[Any ONE]** (1 x 2) (2)
2.3.6	Give a term used for the movement of businesses away from land-use zone **A** towards the suburbs. **Decentralisation (1)** (1 x 1) (1)

2.3.7	People and businesses are often forced to move out of land-use zone **A**. In a paragraph of approximately EIGHT lines, discuss factors that cause businesses to move away from land-use zone **A**. **Overcrowding at A forces people to move to the periphery. (2) (Spatial forces)** **Traffic congestion and poor public transport force them to move to the outskirts / Insufficient parking (2)** **The need for a special site that cannot be found in land-use A (2) (Site force)** **Pollution (noise, water, air) forces people and businesses out into the suburb. (2) (Situational force)** **Urban decay forces people and businesses out into the suburbs (2)** **High rents, rates and taxes force people and businesses to move out. (2) (Economic force)** **City centre is seen by people as old and regulated.(2) (Status force)** **High crime rate in CBD (2)** **High level of competition for space and customers (2)** **[Any FOUR]** (4 x 2) (8)

2.4 Refer to the photographs showing buildings in two land-use zones.

2.4.1	Classify the residential area shown in the photograph as either high income or low income. **Low income (1)** (1 x 1) (1)
2.4.2	Give evidence from the photograph to support your answer to QUESTION 2.4.1. **Space between houses is limited/high density (2)** **Small plots (stands) (2)** **Size of the houses are small/ Low cost housing (accept examples)/ RDP (2)** **Similar style/design of houses (2)** **Limited infrastructure (accept examples) (2)** **Houses appear in rows (2)** **Lack of vegetation (accept examples) (2)** **Little or no recreational facilities (2)** **[ANY ONE]** (1 x 2) (2)
2.4.3	Why is the type of residential area (answer to QUESTION 2.4.1) often located close to an industrial area? **Employment opportunities (2)** **Saves travel time (2)** **Easy access to the place of employment (2)** **Lower traveling costs (2)** **Land is affordable/cheaper (2)** **Unskilled/semi-skilled labour (2)** **[ANY TWO]** (2 x 2) (4)
2.4.4	Give TWO social injustices that are experienced by people in this residential area due to the industrial activity at **B**. **Air pollution (accept examples) (2)** **Noise pollution (accept examples) (2)** **Water pollution (accept examples) (2)** **Health related problems (accept examples) (2)** **[ANY TWO]** (2 x 2) (4)

2.4.5	Explain TWO measures that can be implemented by the industries at **B** to reduce the impact of the social injustices. **Install filters on chimneys to reduce air pollution (2)** **Increase the height of chimneys to disperse air pollution (2)** **Implement legislation to control the amount of pollution associated with the industries (accept examples) (2)** **Conduct research to determine the effect of their activities on the people or the environment (2)** **Regular maintenance of infrastructure related to the industries (2)** **Employ environmental officers to monitor pollution levels (2)** **Introduce noise reduction methods to limit noise pollution (2)** **Develop greenbelts / buffer zones around industries (accept examples) to control air pollution (2)** **Encourage the use of green energy to reduce pollution levels (2)** **Compensate the community for health care as a result of air pollution (2)** **[ANY TWO]** (2 x 2) (4)

2.5 Study the case study on the growth of South African urban settlements.

2.5.1	Give ONE factor from the case study which indicates why people prefer to live in urban areas. **Many opportunities for work and leisure (1)** **Improved health (1)** **Improved education (1)** **Economic activities (1)** **Services concentrated in a small area (1)** **[Any ONE]** (1 x 1) (1)
2.5.2	Differentiate the terms *level of urbanisation* and *rate of urbanisation.* **Level of urbanisation refers to the <u>percentage of a country's population that lives in urban areas</u>. (2)** **Rate of urbanisation refers to the <u>speed or rate at which the urban population is increasing over time</u>. (2)** (1 x 2) (2)

2.5.3	Explain why the case study refers to Gauteng as the province with the biggest and fastest-growing population in South Africa. **Gauteng is located centrally which means that it is very accessible (via road, air, rail). (2)** **Gauteng has a high concentration of industries. (2)** **Gauteng has a well-developed infrastructure. (2)** **Gauteng is the economic hub of the country. (2)** **Many opportunities for work and leisure can be found in Gauteng. (2)** **[Any ONE]** (1 x 2) (2)
2.5.4	According to the case study, "rapid urbanisation degrades environmental and health conditions". Describe how rapid urbanisation results in the degradation of health and environmental conditions. **More people and activities in the urban areas will result in more environmental problems, e.g., pollution. (2)** **Higher population density will result in exhaustion of natural resources. (2)** **More infrastructure development e.g., roads, houses will result in destruction of the natural environment. (2)** **More people will result in an increase in temperature (Urban Heat Island/pollution dome/smog) further resulting in an alteration to the natural environment (2)** **[ANY TWO]** (2 x 2) (4)

2.5.5	Explain how increasing urbanisation places pressure on service delivery in Gauteng. • **Rapid population growth increases the demand for housing, resulting in housing shortages and the growth of informal settlements. (2)** • **More people require access to water, placing pressure on existing water supply systems and increasing the risk of shortages. (2)** • **Increased urban populations lead to higher demand for electricity, causing strain on the power supply and infrastructure. (2)** • **Urbanisation increases the demand for healthcare services, leading to overcrowded clinics and hospitals. (2)** • **More learners moving into cities place pressure on schools, resulting in overcrowded classrooms and increased demand for educational facilities. (2)** • **Increased population growth places pressure on sanitation and waste removal services, leading to service backlogs and environmental problems. (2)** • **More people travelling within urban areas increases demand for roads and public transport, resulting in traffic congestion and overcrowded transport systems. (2)** • **Municipalities may struggle to provide services at the same rate as population growth, leading to service delivery protests and community dissatisfaction. (2)** **[ANY THREE]** **Accept any other relevant explanation of how urbanisation affects service delivery in Gauteng.** (3 x 2) (6)

[Question 2: 60 marks]
Section A Total: 120 marks

SECTION B – MAPWORK

3.1 – Calculations [10]

3.1.1. **What** is located at 6 on the orthophoto map?? (1x1) (1)

A river / Alexander bridge/ a bridge √

3.1.2. **Provide** the coordinates for windpump in block A4 on the topographic map. (2x1) (2)

27°36'42" (40 to 44'') South and 27°13'22" (20 to 24'') East √√

3.1.3. **Calculate** the **average gradient** between spot height 1344 (block E1) and spot height 1346 (block D4) on the ORTHOPHOTO.

Formula: Average gradient = $\dfrac{\text{Vertical interval (VI)}}{\text{Horizontal equivalent (HE)}}$

1344 – 1346 = 2m √

12.5cm √ (accept 12.5 to 12.8cm)

12.5cm = 1.25km = 1250m √

2/1250

= 1 : 625 √

(4x1) (4)

3.1.4. Calculate the **area** of the orthophoto map as seen on the topographic map. Answer in km².

Formula: Area = Length x Breadth

(3.9km √ x 0.5) x (3.9km √ x 0.5) (accept 3.9 to 4cm)

1.95km x 1.95km

= 3.9 km² √

(no units = -1)

(3x1) (3)

Question 3.2 – Interpretation [12]

3.2.1. The feature found at approximately 27°37’35” South and 27°13’25” East on the topographic map is …

A. Trig beacon. √
B. Diggings.
C. A Dam.
D. Sewerage works. (1x1) (1)

3.2.2. The presence of many dams in this area indicates…

A. Rain all year.
B. A very dry area.
C. Seasonal rain. √
D. Dessert-like conditions. (1x1) (1)

3.2.3. The map to East of 2727CA is….

A. 2727DB
B 2726DB √
C 2627DB (1x1) (1)
D 2727BD

Refer to the topographic map and answer the questions that follow.

3.2.4. **Which** area is wealthier, Koekoe Village or Kroonstad? (1x1) (1)

Kroonstad √

3.2.5. **List** TWO pieces of evidence from the map to justify your answer to question 3.2.4. (2x1) (2)

[Any TWO]

Kroonstad larger plots √

More green spaces √

Golf course present √

Highway access √

3.2.6. **List** TWO site factors evident on the map that played a role in the development of Kroonstad. (1x2) (2)

[Any TWO]

Water, flat gradient, good soil, forests √√ `(1 mark each)

3.2.7. **Discuss** Kroonstad's situation. Refer to both physical and economic factors in your answer. (2x2) (4)

[Must discuss BOTH]

Physical - Water, flat gradient, good soil √√

Economic – Access to road and rail, key river crossing, exporter, gold mining√√

[12]

Question 3.3 – GIS [8]

Refer to the image below and answer the questions that follow:

3.3.1. **What** type of sensing is being shown in the image, remote sensing or physical sensing? (1x1) (1)

Remote √

3.3.2. **Provide** ONE advantage of using drones to survey fields. (1x2) (2)

[Accept reasonable]

Covers large area √

Cheaper √

Quicker √

Better tech √

3.3.3. **List** TWO layers farmers might use in GIS. (2x1) (2)

[Any TWO]

Water, gradient, road access, climate (heat) etc. √√

3.3.4. **Can** GIS help farmers increase their yields? Provide ONE reason to support your answer. (1+2) (3)

Yes √ [Any logical answer]

Helps with climate prediction, optimisation, water flow, boundaries etc. √√

[8]

TOTAL SECTION C: [30]

GRAND TOTAL: 150 MARKS
