

PARKTOWN BOYS' HIGH SCHOOL
DEPARTMENT OF GEOGRAPHY

GEOGRAPHY

—June PAPER 2—

27 June 2025

Examiner: Mr. D Grace

Internal Moderator: Mr. A Meintjes

External Moderator: Mr. C. Ritter

TIME: 3 hours

MARKS: 150 Marks

SECTION A – Settlement Geography

QUESTION 1: Short Questions

1.1. Various possible answers are provided for each question. Write down only the letter of the correct answer next to the corresponding number.

1.1.1. Urban settlements that are accessible and provide goods and services to surrounding areas are known as ...

- A. Specialised cities.
- B. Break-of-bulk points.
- C. Central places.
- D. Gateway towns. (1)

1.1.2. Settlements that are established at points where one mode of transport is exchanged for another are known as ...

- A. Specialised cities.
- B. Break-of-bulk points.
- C. Central places.
- D. Gateway towns. (1)

1.1.3. Vatican City is a settlement devoted almost entirely to religion. This is an example of what kind of settlement?

- A. Junction town.
- B. Central place.
- C. Gap town.
- D. Specialised city. (1)

1.1.4. Saldanha Bay is a settlement that was established around the largest and deepest natural port in South Africa, with its primary function being to assist in trade. What type of settlement would this be?

- A. Break-of-bulk point.
- B. Junction town.
- C. Gateway town.
- D. Central place. (1)

1.1.5. A settlement that is established around mining operations would be primarily associated with which functions?

- A. Primary functions.
- B. Secondary functions.
- C. Tertiary functions.
- D. Quaternary functions. (1)

1.1.6. A settlement that is established around universities such as Oxford would be primarily associated with which functions?

- A. Primary functions.
- B. Secondary functions.
- C. Tertiary functions.
- D. Quaternary functions. (1)

1.1.7. Which of the following main ideas underpin Central Place Theory?

- A. Distance results in travelling costs, and consumers always wish to reduce travelling costs.
- B. Businesses aim to maximise profits by attracting the most customers.
- C. People want the cheapest price and convenience when shopping.
- D. All of the above. (1)

1.1.8. The area from which a business draws its customers is known as ...

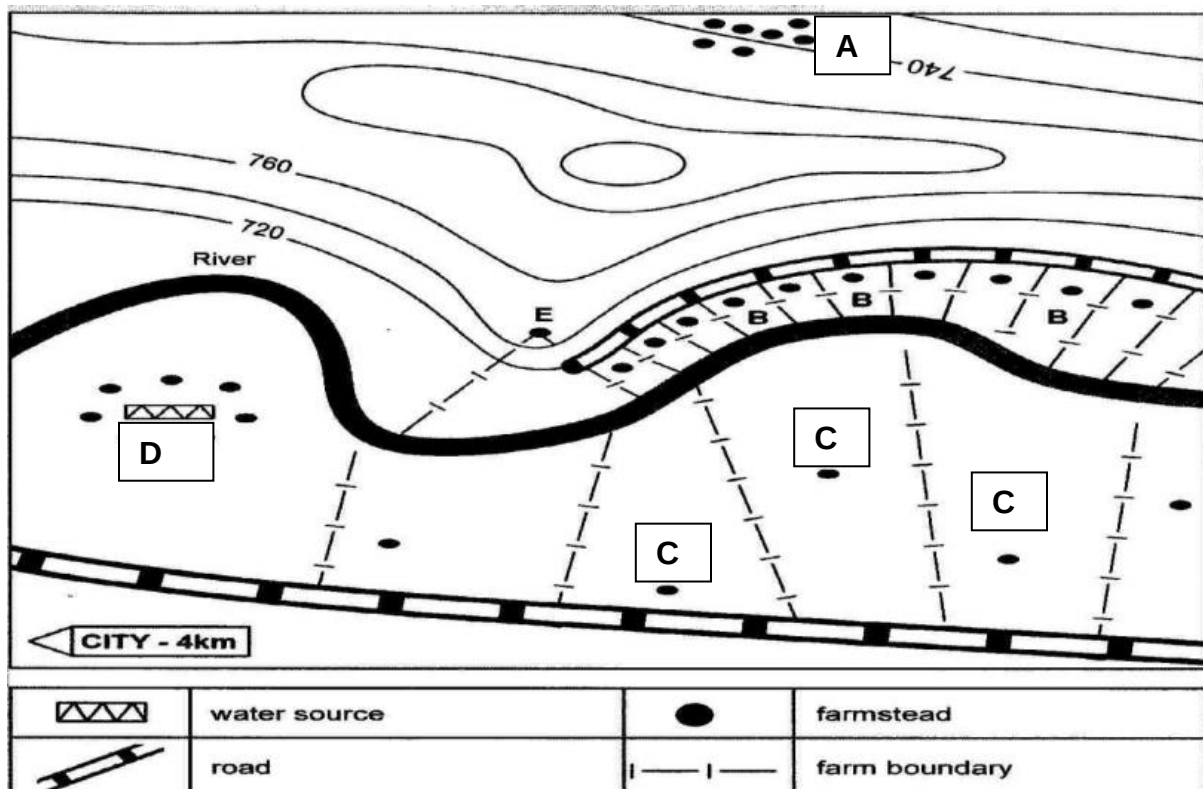

- A. Range of customers.
- B. Range of goods.
- C. Sphere of customers.
- D. Sphere of influence. (1)

(8 x 1) (8)

1.2. Read the following statements and choose the appropriate word(s) in brackets to make the sentence TRUE. Write down only the question number (1.2.1 to 1.2.7) and the correct answer in the ANSWER BOOK, e.g. 1.2.8 town.

- 1.2.1. The smallest rural settlements are (hamlets/isolated farmsteads).
- 1.2.2. A (town/hamlet) is the smallest urban settlement.
- 1.2.3. When two or more large urban cities merge, a (conurbation/metropolis) is formed.
- 1.2.4. A (metropolis/megalopolis) is the main city within a particular region.
- 1.2.5. The (multiple nuclei/third world) city model is based on the idea of multiple 'centres' within a city.
- 1.2.6. Overcrowding and congestion is a (centrifugal/centripetal) force that drives people and business out of a city centre.
- 1.2.7. Functional convenience would be a (centrifugal/centripetal) force that attracts businesses and people to a particular area in a city. (7 x 1) (7)

1.3. Refer to the image below and answer the questions that follow:

1.3.1	Match each of the rural settlements labelled A, B, and C with one of the following statements.	
1.3.1.1	Irregular and nucleated pattern.	(1x1)(1)
1.3.1.2	Irregular and dispersed pattern.	(1x1)(1)
1.3.1.3	Nucleated pattern and linear shape.	(1x1)(1)
1.3.2	Settlement D is classified as a wet point settlement. Differentiate between wet and dry point settlements.	(2x2)(4)
1.3.3	Provide Two reasons why settlement C would not be favourable for vegetable farming.	(2x2)(4)
1.3.4	Describe TWO factors that may have influenced the pattern and shape of settlement A.	(2x2)(4)
		[15]

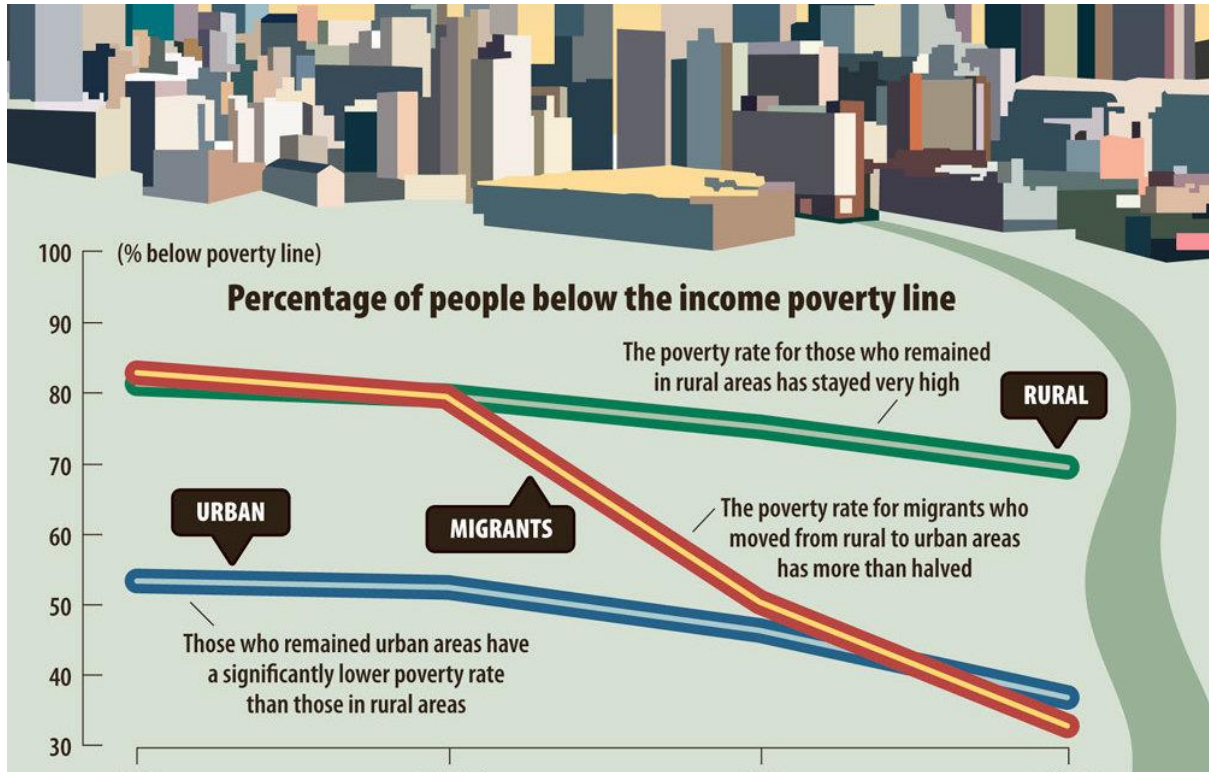

1.4. Refer to the image below of a farm in the Western Cape and answer the questions that follow:

1.4.1	Describe the situation of this farm.	(1x2)(2)
1.4.2	List and discuss THREE physical factors that favour farming at this site.	(3x2)(6)
1.4.3	Would this settlement pattern be nucleated or isolated?	(1x1)(1)
1.4.4	Describe and explain TWO advantages of this type of settlement pattern.	(2x2)(4)
1.4.5	Why would a farm like this be expensive if purchased by a farmer?	(1x2)(2)
		[15]

QUESTION 2: Rural depopulation

2. Study the image below and answer the questions that follow:

2.1	Define the concept <i>rural depopulation</i> .	(1x2)(2)
2.2	List ONE push factors leading to rural depopulation?	(1x1)(1)
2.3	Compare the poverty rate trend between rural areas and those who have migrated to urban areas. What does this suggest about rural depopulation?	(1x2)(2)
2.4	Consider the image above. In approximately eight lines , discuss how rural-urban migration affects poverty levels and communities in both rural and urban areas. In your answer, consider the reasons for rural depopulation, its socio-economic impacts, and potential ways to reduce rural poverty.	(4x2)(8)
		[15]

SECTION B – Urban Geography

QUESTION 3: Urban Settlement

3. Match the statements in column A with the options in column B. Write only the letter (Y or Z) next to your question numbers. Example: 3.1.8 Z [7]

Column A	Column B
3.1.1. A clustered settlement	Y Dispersed Z Nucleated
3.1.2. Forces that attract people and businesses in the city centre.	Y Centripetal Z Centrifugal
3.1.3. Exact piece of land where the settlement is built.	Y Situation Z Site
3.1.4. The largest type of urban settlement.	Y Megalopolis Z Conurbation
3.1.5. An example of a specialised town.	Y Johannesburg Z Paarl
3.1.6. Forces that drive people and businesses away from the city centre.	Y Centripetal Z Centrifugal
3.1.7. When all roads in an area are congested resulting in no movement of vehicles.	Y Gridiron Z Gridlock

4. Various possible answers are provided for each question. Write down only the letter of the correct answer next to the corresponding number.

4.1. Various possible answers are provided for each question. Write down **only the letter** of the correct answer next to the corresponding number.

4.1.1. Urban settlements that develop at important transport junctions, such as road and railway junctions are referred to as ...

A. Junction towns.

B. Break-of-bulk points.

C. Central places.

D. Gateway towns. (1)

4.1.2. A/An ... and ... street pattern is associated with informal settlements.

i) Unplanned

ii) Planned

iii) Regular

iv) Irregular

A. (i) and (ii)

B. (i) and (iv)

C. (ii) and (iii)

D. (ii) and (iv) (1)

4.1.3. Vatican City is a settlement devoted almost entirely to religion. This is an example of what kind of settlement?

E. Junction town.

F. Central place.

G. Gap town.

H. Specialised city. (1)

4.1.4. Saldanha Bay is a settlement that was established around the largest and deepest natural port in South Africa. What type of settlement would this be?

E. Break-of-bulk point.

F. Junction town.

G. Gateway town.

H. Central place. (1)

4.1.5. A settlement that is established around mining operations would be primarily associated with which functions?

E. Primary functions.

F. Secondary functions.

G. Tertiary functions.

H. Quaternary functions. (1)

4.1.6. A settlement that is established around universities such as Oxford would be primarily associated with which functions?

E. Primary functions.

F. Secondary functions.

G. Tertiary functions.

H. Quaternary functions. (1)

4.1.7. Which of the following main ideas underpin Central Place Theory?

E. Distance results in travelling costs, and consumers always wish to reduce travelling costs.

F. Businesses aim to maximise profits by attracting the most customers.

G. People want the cheapest price and convenience when shopping.

H. All of the above. (1)

4.1.8. The area from which a business draws its customers is known as ...

E. Range of customers.

F. Range of goods.

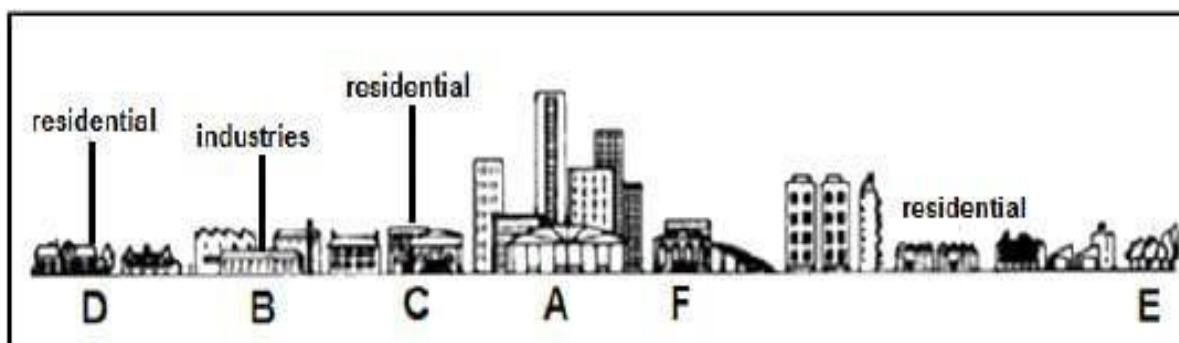

G. Sphere of customers.

H. Sphere of influence. (1)

(8 x 1) (8)

QUESTION 5: Central place theory

5. Refer to the image below and answer the questions that follow:

5.1	What is central place theory?	(1x2)(2)
5.2	Provide a label for A in the Urban Profile above?	(1x1)(1)
5.3	Account for the land use at B.	(1x2)(2)
5.4	Describe ONE centrifugal force that would result in residents moving from C to the more upper class residential area between F and E .	(1x2)(2)
5.5	Using A as your Central Place, draw a simple diagram to explain Central Place Theory and incorporate the keys terms of Threshold Population, Sphere of Influence and Range. You may draw two comparative Central Places to aid in your answer if you wish.	(4x2)(8)
		[15]

QUESTION 6: Urban Settlement Issues

6. Refer to the image below and answer the questions that follow:

6.1	What is meant by the term urban decay?	(1x2)(2)
6.2	Identify and explain TWO common issues that arise in urban settlements due to rapid urbanization.	(2x2)(4)
6.3	Do you think that new cities are the answer to South Africa's Urban issues? Discuss ONE reason to justify your answer.	(1+2)(3)

6.4	The cartoon image suggests a choice between “Bad” and “Worse” options. In the context of urban settlement issues, evaluate TWO possible impacts that living in poorly managed urban areas can have on residents’ quality of life.	(2x2)(4)
6.5	Explain the humour in the cartoon.	(1x2)(2)
		[15]

QUESTION 7: Urban Settlement Issues

7. Refer to the image below and answer the questions that follow:

7.1	Explain the term <i>informal settlement</i> .	(1x2)(2)
7.2	List ONE economic reason for the rapid development of informal settlements across South Africa.	(1x1)(1)
7.3	Explain how living conditions within informal settlements can have a negative effect on the health of its residents.	(2x2)(4)
7.4	In a paragraph of approximately eight lines, discuss FOUR strategies that will upgrade and improve informal settlements.	(4x2)(8)
		[15]

TOTAL SECTION B: [60]

SECTION C – Mapwork

Refer to the topographic and orthophoto of Ladysmith 2829DB to answer the following questions:

uMnambithi (formerly **Ladysmith** until 2024^{[3][4][5]}) is a town in the Uthukela District of KwaZulu-Natal, South Africa. It lies 230 kilometres (140 mi) north-west of Durban and 365 kilometres (227 mi) south-east of Johannesburg. Important industries in the area include food processing, textiles, and tyre production. uMnambithi is the seat for both the Alfred Duma Local Municipality and Uthukela District Municipality.

Question 12 – Calculations [10]

12.1 Calculate the average gradient between spot height 1159 (block A1) and spot height 1118 (block A2).

Formula: Average gradient =
$$\frac{\text{Vertical interval (VI)}}{\text{Horizontal equivalent (HE)}}$$
 (4x1) (4)

12.2 Calculate the distance from the windpump (block A5) to trig beacon 333 (block C4) (3x1) (3)

12.3 Calculate the area of the orthophoto map (3x1) (3)

Question 13 – Interpretation [10]

13.1 The feature found at approximately 28°34'25" South and 29°48'25" East is ... (1x1) (1)

- A. Farm land.
- B. Diggings.
- C. A Dam.
- D. Sewerage works .

13.2 The presence of many dams in this area indicates... (1x1) (1)

- A. Rain all year.
- B. A very dry area.
- C. Seasonal rain.
- D. Dessert-like conditions.

13.3 The map to East of 2829DB is....

(1x1) (1)

- A. 2829CB
- B. 2830CA
- C. 2930DB
- D. 2829CC

Refer to the orthophoto and answer the questions that follow.

13.4 **Which** area is wealthier, Hillside or Leonardsville?

(1x2) (2)

13.5 **Provide** a reason to justify your answer to QUESTION 13.4.

(1x2) (2)

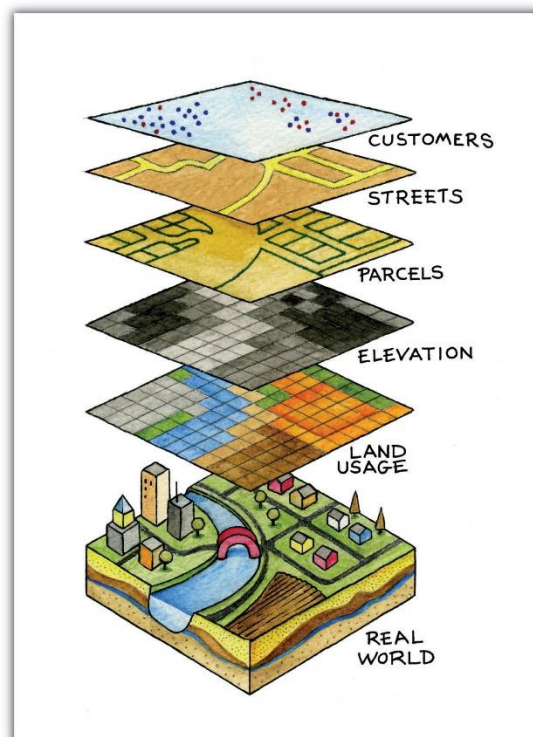

13.6 **Provide** ONE reason for the location of feature 6.

(1x2) (2)

[10]

Question 14 – GIS [10]

Refer to the image below and answer the questions that follow:

14.1 **List** ONE layer seen on the image above.

(1x1) (1)

14.2 Many of these layers were recorded using active remote sensing.

What is active remote sensing? (1x2) (2)

14.3 **List** Three reasons for the development of GIS. (3x1) (3)

14.4 **What** is passive remote sensing? (1x2) (2)

14.5 **What** does GIS stand for? (1x2) (2)

[10]
